

Product Name :
Magnifier, Flexible Arm, Illuminated**Product Code :**
ALTECEDULABB0818**Description :****Magnifier, Flexible Arm, Illuminated**

This magnifier has a large sized high quality, optically ground and polished glass convex lens about 130 mm. diameter, assuring fine vision without objectionable color fringes. The specially designed precision lens gives 4x area magnification without any chromatic or spherical aberrations over the entire field of view, thus providing perfect strain-free vision. The lens provides binocular vision with depth perception and comfortable 250 mm. working distance underneath, thus providing for ease of operation under the lens.
