

Product Name :
Pitot Static Tube Apparatus**Product Code :**
ALABS-A43-002**Description :****Pitot Static Tube Apparatus**

The

Pitot Static tube apparatus consists of two tubes called Stagnation pressure tube and the static pressure tube. The difference of pressure between two indicates the dynamic pressure, which is a measure of the velocity of the flow.

Pitot

and Actual velocities are calculated to find out Calibration factor C_v
The apparatus has Clear Perspex channel helping students understand theoretical concept
