

Product Name :
Semi Automatic Microtome

Product Code :
ALABS-A49-043

Description :

Semi Automatic Microtome

Function and characteristic:

-

Motorized drive.

-

Compatible Embedding Material paraffin, plastic.

-

The cutting and trimming function can be finished by the control system.

-

The handwheel can be locked at any position, so as to ensure the safety of the operation.

-

The large waste tray can be Exchanged arbitrarily.

-

Two kinds of the specimen clamp can be changed conveniently, and it has the alarm system.

-

Switch arbitrarily between section and trimming.

- Alarm system for horizontal and vertical stock limit, protection system for motor surcharge.

Technical Specifications:

- Range of the thickness of slice: 0-100mm
- Range of the thickness of trimming: 0-100mm
- Setting thickness of slice ranges:
 - 0-10mm increment 1mm
 - 10-20mm increment 2mm
 - 20-100mm increment 5mm
- Horizontal specimen stroke: 26mm
- Vertical specimen stroke: 60mm
- The retraction of the specimen clamp: 20mm
- Minimum setting thickness of slice: 1mm

- Maximum section of slice: 50x50mm
- Disposable-blade holder can be used for low & high profile disposable blade.
